EDIT: I can no longer recommend this since the game has been long abandoned and the servers seemingly taken down.

View the old review down below.

It's an interesting hack and slash PVP arena game. So far the dev responses have been amazingly professional. However, the game lacks quite a bit of polish. But this is to be expected with the game being in early access. Any population problems with the playerbase is because there just hasn't been a lot of buyers into this game. They have started an event to increase the playerbase though, which is a pretty bold move for these devs.

This kind of PVP is a bit of a twitch-based action PVP game mostly focusing on only melee weapons. Sword, Greatsword, Dual wield, Hammer, Axe, and Hwando are available thus far. ...And as well as fist fighting as well.

If this interests you and you're willing to support the devs. Go ahead and buy a copy. They also don't mind negative reviews as they want all kinds of input to improve their game. As long as it's actual input.. Great puzzle platformer. Puzzle and platform are equally important in the game, both skill and brains will be needed to beat it and even more so to complete all the secret levels.. Love Engine is fun, relaxing, and challenging. I really enjoyed this game. I found myself breezing through the puzzles pretty quickly; however, a few of them stumped me for a bit.

The game is incredibly fun to play overall, but is it worth the money? If you don't mind paying for only 2 hours worth of content, the answer is yes. The game is cute, easy to pick up, and a great way to burn a couple of hours.

Pros- Beautiful music

----- Easy to play

----- Somewhat challenging puzzles

Cons- No option to pick specific levels

----- Game length. This game....This game is the hardest game you'll ever play you run out of live start over ♥♥♥♥♥, you get killed by a shark start over ♥♥♥♥♥. This game is harder than dark souls 1 and 2 combined. The story in this game is a masterpiece that can match games like Bioshock Infinite and The Last Of Us. It is a heartbreaking story about a baby fishes mother dying and the baby fish must rise up in the ranks of the Fish Empire. You are Adolph Fidler. Sieg Fish.. very creepy lol scared me and I only played a few minutes and turned it off but imma try my best to keep playing game is awesome love the creepy silenthill settings omg. Honestly, I've only completed the tutorial, the free play, and the first part of the first level in campaign mode, but I'm in love with this game. Personally, I think what VR needs right now is more RPGs. And while this is only kind of an RPG (there's not really any equipment to customize or leveling up), it's definitely a step in the right direction.

This is such an immersive experience for me. The stealth elements of this game make me feel like I'm really surrounded by goblins and orcs and could be caught at any moment. I love being able to throw little diversions across the map and catch my enemies off guard. I'd also say, from a mechanics perspective, this bow and arrow feels the most real out of any other game I've played that incorporates it.

The graphics are also awesome. That ugly-mugged goblin looks like it could be standing right in front of me.

I'll probably update this review with more details once I finish campaign mode - but I really don't see my opinion of this game changing.. Ok game. I breezed through the Championship league with ease just to be stymied in the Premier league, not scoring

a goal in 20 games. Seriously?. It's so realistic that it feels like I'm really there.. The game is awesome!
A lot of characters and a lot of cars!

It's like Mario Kart but you can drive too in the water and in the sky!

I recommend it if you like that genre!

Commercial is the scheme maybe to some people. It is a very fun game and nice storyline to follow. I would highly recommend people giving this game a fair chance if you like story-based games.. What can I say that those playing this won't already know.

The game is very reminiscent of Ultima Online - the first MMO that ruined my younger education from a standard academic point of view, but actually enhanced my programming skills when I learnt how to macro..

But, Ultima Online is now very dated and feels clunky. This is where I appreciate Wild Terra. If you can get over the jittery scrolling, the game is surprisingly deep and well thought through.

My ONE critique.. albeit one, very critical critique.

This game should be called f***ing WOLF TERROR, not Wild Terra.

If a wolf kills you, don't try and get your\u2665\u2665\u2665\u2665\u2665 back. Those things are, and as expected, ferocious furry bastards with an aggro range like an absolute beast and a penchant for killing noobs clad in the complementary Christmas furs carrying a wooden shovel.

Oh, and on my first purchase of a 'lock-box-esque' item, I received a 'rare' mount. A rat with blood round its mouth. NICE!

Play it, you'll enjoy it. But you'll agree with me quickly. \u2665\u2665\u2665\u2665 WOLVES!. Western rail shooter. Good enough for the genre, but I doubt you'll play this more than once. Probably would be cool in VR.. Amazing a perfect conclusion but could of had a after story chapter.. Good game with a new anti cheat. Just needs some tlc to fix bugs. Use to play first nether when it was hacker infested. THAT IS NO LONGER THE CASE!!. This is one of my favorite games I have played so far. The game is text based and feels like a book, though you have choices that actually matter. I am planning playing through the game a second time.
